YUME DX

Head Spa, The Relaxation of The Future

With all the existing benefits of the Yume, the Yume Deluxe offers an additional function. The rotatable bed and removable headrest means that the Yume DX is not limited to services for the hair. Facial treatments and upper body massages can also be performed. The features of the Yume DX mean that you can expand the level of treatments you can provide, offering the client more and increasing the salons revenue.

Detachable headrest

It forms a part of the flat-bed and broadens your opportunities for providing a combination of multiple treatments.

90 degrees chair rotation

The seat can be fixed in any position offering you flexibility and variety of treatments including facials and massage.

Extendable legrest

Choose the ideal position for the comfort of your customers when sitting or rising from the chair.

Shock absorbers

Shock absorbers dampen any jolts that would otherwise occur so as to not disturb the comfort and relaxation of your customers.

YUME

Cocooned in Comfort

Yume Stool

Fixed base with a flexible stem, this stool combines flexibility with ultimate comfort for optimum ease of use.

The newly developed design offers ultimate comfort. Together with a gel neckrest, two gel filled head cushions support the back of the head reducing pressure on the neck. This design aspect is perfect for longer treatments at the basin.

Easy & Smooth Positioning

The backrest simulates the natural reclining movement of the human body, enabling the customer to achieve the perfect shampoo position smoothly. The lower initial seat height is perfect for shorter or elderly customers to access the chair safely.

Seated Shampoo

When offering longer treatments such as Head Spa, staff are able to use a stool at the basin.

Standing Shampoo

The height of the Yume Shampoo chair can be adjusted for either side or rear shampoo.

Ergonomically designed head / neckrest

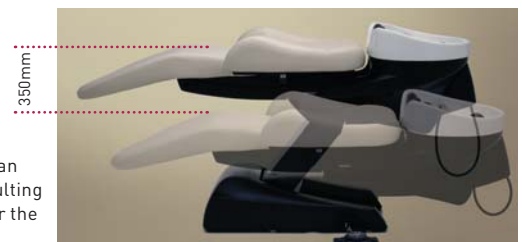

Axis 1 - Supports whole unit
Axis 2 - This biaxial mechanism gives a great flexibility in positioning your customers' head.

Height Adjustment

The height of the Yume Shampoo chair can be adjusted from 480mm to 830mm resulting in the perfect working position no matter the height of the operator.

RS Oasis

Freedom of Movement

Basin: White
Body cover: Pearl White / Silver / Red / Yellow / Pink

The Oasis has a clever floor level plumbing system which is placed behind the Styling chair. The mobile unit is installed and released simply by pressing a pedal. The mobile unit can be taken out and stored away until it is needed again.

Ingenious mobile shampooing system consisting of movable upper unit and floor-level docking station. Unit incorporates back and forward sliding basin with gel-filled neck cushion and thermostatically controlled water temperature for ultimate Client comfort.

RS Swing

Ingenuity in Motion

Basin: White
Body cover: Pearl White

The Rear Swing is a clever Shampoo unit that allows the basin to be moved away from the client. Designed to cover two separate positions, the Rear Swing enables the salon to carry out such services as relaxing hair treatments and intricate technical work at the backwash without the customer moving. It also allows the customer to remain in the Shampoo area without the inconvenience of their occupying the actual basin. Dimensions and product options available on request.

NRS Kaze

The New Generation of Takara Shampoo Units

Lumbar supports automatically adjust to suit the individual customer's shape and size. The basin's unique gel-filled neck cushion, which cleverly snaps onto the bowl reduces pressure on the customer's neck and adds to the overall feeling of relaxation. Thermostatically controlled, the Kaze units ensure consistent water temperature and an enjoyable Shampoo experience.

Basin: White,
Body cover: Black / White

NRS Separate

Free-standing Adjustable Basin Unit

Basin: White,
Body cover: Black / White

Shampoo Station

The World's Most Luxurious Shampoo Unit

Free-standing Shampoo basin with thermostat and ergonomic showerhead. It delivers 12 litres of mixed water per minute* for the most invigorating shampoo ever. The attention to detail on the Shampoo Station is second to none, making it the world's most advanced and luxurious Shampoo unit.

*Subject to individual water pressure.

Basin: Black (with black body cover) / White (with silver body cover)

Majolica

A Japanese Ceramic Wall-mount Basin

Wall-mounted version of the Shampoo Station, it has exactly the same fixtures and fittings. This basin is made of high-quality ceramic and can be mounted onto a wall or built into a custom-made cabinet*.

*Not supplied by Takara Belmont.

Basin: Black / White
